# CSE 111: Final Phase

Jonathan Alfaro & Ediel Lopez

Project Description

- A video game database
- Users can view things like reviews, games, publisher info, developer info, and also learn what platforms these games are available on
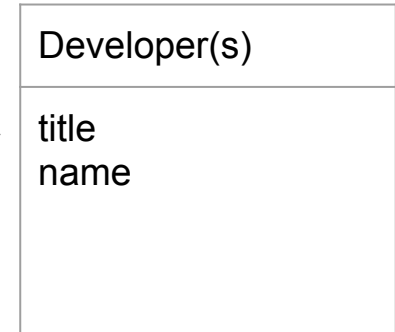

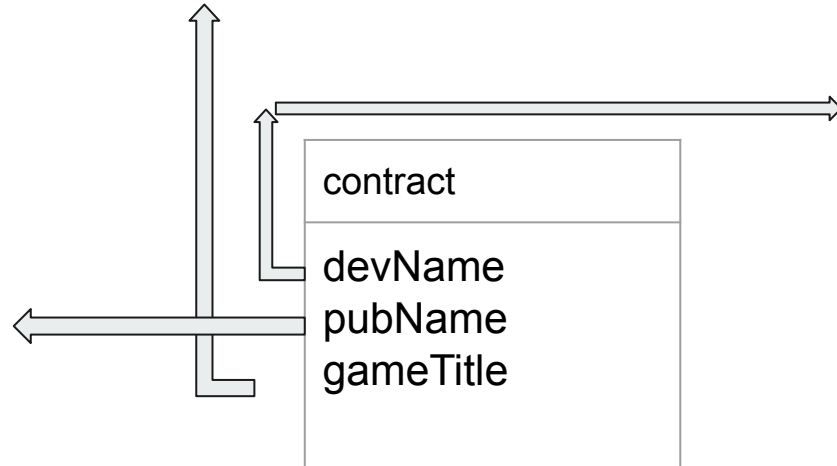

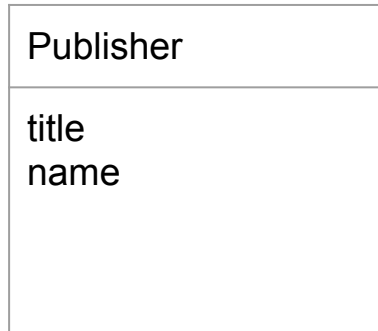

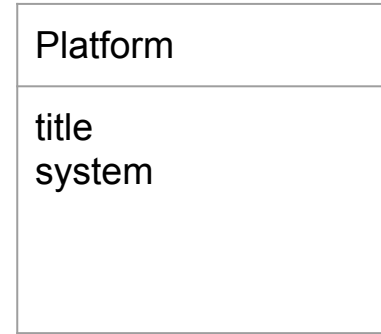

Use Case Diagram

contract

devName
pubName
gameTitle
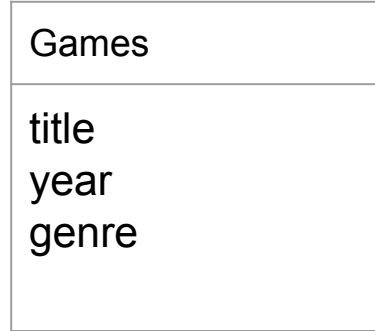

Implementation details:

- Python was used for the database

- html/css/js were used for the user interface

- Node.js was used to connect the back end to the front end

Thank You!
